The performance figures quoted above represent the performance of the TIBER DIVERSIFIED UCITS Fund since launch on 18th May 2015. These performance figures refer to the past and past performance is not a reliable guide to future performance.

Trading Strategy

The Tiber Diversified Program trades several of the most liquid exchange traded futures markets using different algorithms with a fully systematic execution. Average holding period of about 4.5 days. The Program is traded with multiple strategies including mean reversion, volatility breakout, pattern recognition and momentum and tactical trend strategies. Each position has its own stop loss and the aim is to create a diversified portfolio with respect to sectors and strategies.

TIBER DIVERSIFIED UCITS Fund*

*The above performance pertains to the performance of the TIBER Diversified Program since Jan 2014 as per the managed accounts track-record, which is not the UCITS regulated Fund. Figures are gross of Management and Performance fees.

| Min Init. Sub. | 1,000,000 EUR |

ISIN Codes EUR: IE00BYWQC33/IE00BYWQD40

- Short term: investment horizons vary from intraday to about 10 days (average holding period is 4.5 days)
- Fully Systematic: strategy signal generation and execution are completely automated, reducing costs and execution errors
- Multi-strategy
- Daily liquidity
- Low margin/equity (the average is about 5%, with peaks in the range of 12-15%)
- Downside protection
- Adaptive strategies highly responsive to changes in market volatility and dynamics
- Low to no correlation with both traditional asset classes and CTAs
- Rigorous risk management approach
- Filtering techniques: sophisticated functions aiming at making the intraday trading more selective and efficient. It is a suit of models built to capture a higher proportion of variance in forward returns by allowing trading systems to adapt to the different market environments more quickly
