

FACTSHEET

Performance Returns

The OTS Asia Opportunity UCITS Fund was down 1.91% in the month of July.

Investment Objective & Strategy

The OTS Asia Opportunity UCITS Fund is a Pan-Asian, fundamentally focused long/short equity fund seeking to preserve capital and maximize returns under strict value investing discipline. As a value investor, OTS capitalizes on certain themes in the Asian markets, which are inefficient and volatile with limited sell-side coverage. The fund looks for alignment of interests and takes advantage of a divergence in business quality between companies with strong fundamentals and competitive advantages. OTS then seeks companies trading at significant discounts or premiums to justifiable intrinsic values.

Investment Commentary

July 1st marked the 20th anniversary of the return of Hong Kong to Chinese sovereignty, and the OTS team, together with the rest of the city, were treated to massive fireworks displays over Victoria Harbor. Prior to the handover, there were widespread doubts as to whether Hong Kong would be permitted to keep its freewheeling capitalist economic system. Yet while Hong Kong has faced its share of challenges over the past two decades, there can be little doubt that such worries were overblown and in fact, Hong Kong's core economic policies have changed little in the past 20 years.

Half a continent away in India, 1 July 2017 marked another instance of national integration, one of a more prosaic form but whose economic significance is likely to be far greater. July 1st saw the introduction of the Goods and Services Tax (GST), a reform over 30 years in the making.

Investors are hardly known for their enthusiasm about new taxes, yet the GST has been eagerly anticipated as it represents what is arguably the most important economic reform of the past decade.

Traditionally, the 29 states and 7 union territories of India have levied a tangled web of taxes and levies, requiring complex layers of enforcement bureaucracy and creating ample opportunities for corruption and rent seeking. Carrying goods across state borders required passing through duty checkpoints where lines of idle trucks would stretch as far as the eye could see, often waiting days for clearance from tax inspectors. These checkpoints served as significant barriers to trade, effectively preventing India from functioning as an integrated national market.

The GST subsumes a dizzying array of taxes and levies and replaces them with a consistent set of tax rates across the nation. Checkpoints between neighboring states have been abolished. Of course, the GST has been accompanied with considerable fanfare and by most measures the India market does not look cheap. Yet over 60% of listed equities trade below book value. Moreover, many of the greatest beneficiaries of national economic integration are likely to be relatively off-the-radar regional players who are now free to expand beyond their home state. We continue to hold an overweight position in entrepreneur-run, attractively valued companies in India. We thank you for your long-term support.
