

FACTSHEET

Performance Returns

The RoboCap UCITS fund ended September with a NAV of 113.73, up 4.36% from the end of August and up 13.73% YTD.

Investment Objective & Strategy

RoboCap is a thematic equity fund focusing on Robotics and Automation listed stocks. This fast-growing theme includes general automation, industrial robotics, healthcare robotics, 3D printing, drones, autonomous vehicles, key components, enabling software and artificial intelligence. A key aspect of the strategy is that we aim to primarily invest into 'pure-play' stocks which have at least 40% of sales coming from Robotics and Automation related end markets. The portfolio aims to hold 22-30 positions out of a target universe of 150 stocks. The investment selection is based on fundamental proprietary analysis in cooperation with leading robotics experts.

Market Commentary

Amongst a generally strong month for the portfolio there were two stand out sub-themes. The first was 3D printing whose mass production credentials were rubber stamped by General Electric which bought two 3D print manufacturers, one of which Arcam (ARCM SS) was held in the portfolio when the announcement was made. As we did not expect there to be any counter bids, we sold our position in Arcam at a price above GE's offer. Healthcare robotics was another stand out sub-theme driven by technology updates and evidence of widening adoption of the systems in healthcare industry.

The one area of weakness in the month was Autonomous Vehicles which underperformed. The month was marked by the announcement that two of the leading lights in autonomous driving systems, Tesla and Mobileye, would cease to co-operate on the technology going forward. Both were weaker as investors realized they would now become rivals and that it would intensify competition in the space.

From a macro perspective, we still expect market volatility as we believe that central banks policies are still not synchronized. The U.S. presidential elections should not have a major impact on equity markets in the short-term. The U.S. economy has displayed sufficiently strong macro economic numbers to justify one rate hike before year end which may in turn help to weaken the Yen and make Japanese automation stocks more competitive. The earnings season has just started and it is always an opportunity to take advantage of exaggerated price moves.

RoboCap UCITS Fund Performance

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec	Y-T-D
2016	-2.4%	+1.28%	+4.95%	-0.55%	+3.36%	-1.97%	+3.83%	0.43%	+4.36%				+13.73%

The performance figures quoted above represent the performance of the RoboCap UCITS Fund since launch on 4th January 2016. These performance figures refer to the past and past performance is not a guarantee of future performance or a reliable guide to future performance.

THE MANAGER

Jonathan Cohen (CIO) has over 11 years of investment experience in equities acquired at boutique asset management companies and banks like Goldman Sachs. He held the titles of CIO and Senior Portfolio manager during his last positions. Jonathan has a Masters in Management with a major in Finance from the University of St Gallen (HSG).

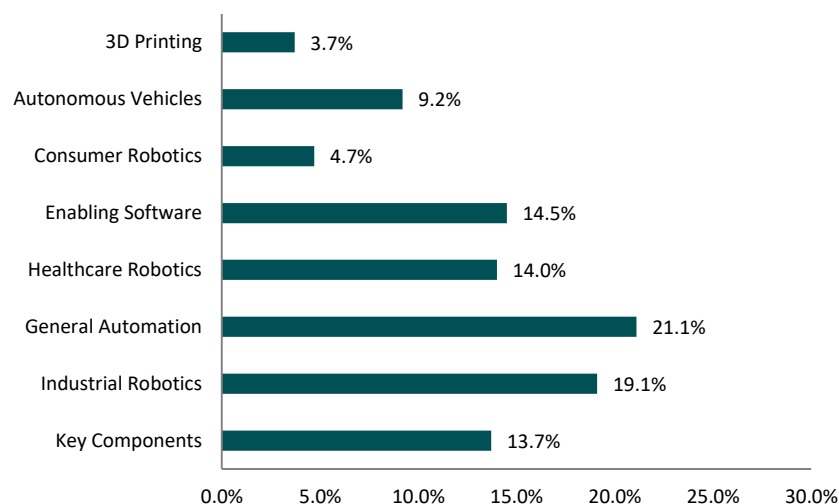

Heenal Patel (Senior Analyst) has over 14 years of experience in equity analysis in the industrials and automotive sectors. He began his career as UBS Global Asset management where he helped to run European industrial and automotive portfolios, before moving onto sell-side positions at DrKW and industrials at S&P Equity Research. He holds a degree in Economics and Finance from the University of Manchester.
