

FACTSHEET

THE MANAGER

Investment Objective & Strategy

The Crabel Advanced Trend UCITS Fund is advised by Los Angeles based managed futures trading pioneer, Crabel Capital Management, LLC. Crabel Advanced Trend is a portfolio of systematic trading strategies designed to efficiently capture long-term trend-following returns across a diverse set of a global futures and foreign exchange instruments. The program aims to generate greater alpha and deliver a more competitive risk-adjusted return than the broader trend-following industry. In pursuing this objective, Crabel Advanced Trend employs multiple price-based strategies engineered to identify and profit from continuations in price movement across approximately 200 markets globally. The program seeks to mitigate downside risk by dynamically sizing trades relative to market volatility, actively employing the use of stops on all positions throughout the portfolio, and effectively diversifying overall portfolio volatility across market sectors and geographic regions. Individual positions are generally held for 35-45 days, and the portfolio in aggregate targets an annualized standard deviation of 15%.

Monthly Commentary

The Crabel Advanced Trend UCITS Fund finished September down -1.27%, which brings the year-to-date return to -9.57%. While a few notable trends emerged or continued with reasonable vigor in September -- energy markets and several equity indices come to mind -- the month was generally choppy with continued overall low volatility which provided scarce opportunities from a trend-following perspective. From a sector standpoint, Commodities and Equities proved useful with positive attributions, while Fixed Income and Foreign Exchange markets were difficult and posted negative attributions. Within the Commodities sector, energy markets in particular offered strong trends as Brent Crude, Crude Oil, Gas Oil and Heating Oil were all among the strongest performing underlying markets on the month. Conversely, in the Foreign Exchange sector, a sharp reversal in the Scandinavian complex of foreign exchange pairs led to setbacks. Crosses against either the Norwegian Krone or Swedish Krona represented the most difficulty for the portfolio on a single instrument level.

Why Advanced Trend?

- **Thoughtful Design.** Intuitive research into time-frame selection, sector exposure, volatility interpretation and trend quality identification is leveraged to maximize trend capture.
- **Aggressive Trading Cost Reduction.** The cost to execute a trend following strategy adds up far more quickly than is realized. Trade slippage is reduced through Crabel's proprietary algorithmic execution infrastructure.
- **Structurally Diversified.** The program is timeframe and sector diversified trading a broad array of derivative instruments.
