

FACTSHEET

Performance Returns

The RoboCap UCITS Fund returned -0.55% in the month of April and + 3.16% YTD.

Investment Objective & Strategy

RoboCap is a thematic equity fund focusing on Robotics and Automation listed stocks. This fast-growing theme includes general automation, industrial robotics, healthcare robotics, 3D printing, drones, autonomous vehicles, key components, enabling software and artificial intelligence. A key aspect of the strategy is that we aim to primarily invest into 'pure-play' stocks which have at least 40% of sales coming from Robotics and Automation related end markets. The portfolio aims to hold 22-30 positions out of a target universe of 150 stocks. The investment selection is based on fundamental proprietary analysis in cooperation with leading robotics experts.

Market Commentary

The RoboCap UCITS fund ended April with an NAV of 103.16 down 0.55% from the end of March but up 3.16% YTD. This performance means that the fund is still up against most major indices this year.

From a country allocation point of view, the strengthening yen helped to drive the Japanese indices down 2.5-3.0% on average. We began to increase our exposure to Japanese equities towards the end of the month while hedging the currency but remain underweight in relative terms versus our investment universe.

Just over half of the companies in the investment universe reported full year or quarterly results in April. Overall most of these names continued to report good underlying trends in terms of profitability, product development and cost control. The near-term outlook for growth was generally positive but some industrial robotics companies had a cautious to negative forecast for Chinese electronics demand in Q2, however this view is not consistent. Autonomous vehicles results beat expectations and have a bullish outlook but the share prices did not follow yet.

Demand for robotics was slightly positive and was expected to remain robust in 2016 even after the strong double digit growth in 2015 driven by new technology, but other forms of automation may trail. Key industry news in the month included the latest figures from International Federation of Robotics, who calculated that industrial robot demand grew 8% in 2015 to 240,000 units. This was the third year in a row robotics sales records have been broken. Geographically China (+16%) in particular remained the strongest source of demand but the U.S. (+11%) and Europe (+9%) showed that the demand for robotics was global.

The Q1 season will offer opportunities to adjust the portfolio by taking advantage of exaggerated stock price moves and adding new positions. Our focus remains on "pure play" companies with a strong business model that will show earnings growth and low correlation. We remain cautious about the global equity markets as we see that volatile markets will continue.

RoboCap UCITS Fund Performance

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sept	Oct	Nov	Dec	Y-T-D
2016	-2.4%	+1.28%	+4.95%	-0.55%									+3.16%

The performance figures quoted above represent the performance of the RoboCap UCITS Fund since launch on 4th January 2016. These performance figures refer to the past and past performance is not a guarantee of future performance or a reliable guide to future performance.

THE MANAGER

Jonathan Cohen (CIO) has over 11 years of investment experience in equities acquired at boutique asset management companies and banks like Goldman Sachs. He held the titles of CIO and Senior Portfolio manager during his last positions. Jonathan has a Masters in management with a major in Finance from the University of St Gallen (HSG).

Heenal Patel (Snr Analyst) has over 14 years of experience in equity analysis in the industrials and automotive sectors. He began his career as UBS Global Asset management where he helped to run European industrial and automotive portfolios, before moving onto sell-side positions at DrKW and industrials at S&P Equity Research. He holds a degree in Economics and Finance from the University of Manchester.
