This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## New Mountain Vantage Long Only UCITS Fund a Sub-Fund of MontLake UCITS Platform ICAV, managed by MLC Management Limited GBP Institutional Class Founder Shares (IE00BYPJR082)

### Objectives and Investment Policy

The investment objective of the Sub-Fund is to seek capital appreciation over the medium to long term.

To achieve this objective, the Sub-Fund will primarily invest in U.S. equities and equity-related securities, with a limited amount of investment in non-US equities. The Sub-Fund will seek to invest based on fundamental research in high quality companies whose securities are substantially undervalued relative to the intrinsic value and where there are opportunities for price appreciation.

The Sub-Fund is not subject to any specific industry sector constraints on target investments, but will generally focus on certain industries such as healthcare (i.e. specialty pharma, hospitals), business services (i.e. payroll services, benefits services and information services), the technology sector (i.e. payment processors, software), media (paid television operators, cable networks) and the energy sector (typically, energy services related companies).

The Sub-Fund may utilise forward contracts for currency hedging purposes only. A forward contract gives the owner the right to buy or sell an asset at a specified future date. The Sub-Fund may also gain exposure through the use of ETFs to U.S. interest rates and

commodities for hedging purposes only.

You can sell your shares any day that banks are open in Ireland and United States. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. one business day before the day on which you want to sell.

Your shares do not pay you income, but instead the Sub-Fund reinvests any income to grow your capital.

As your shares are in Sterling and the Sub-Fund is in U.S. Dollars, forward contracts are used with the aim of limiting the effects of changes in the currency exchange rates against U.S. Dollars.

Recommendation: the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and Reward Profile

The risk category for this fund is set at 5. It is calculated in line with EU regulations and is based on the risk limit for the fund.

**Market Risk:** The Sub-Fund invests in shares and the value of these shares may go down as well as up. Investors may not get back the original amount invested.

**Liquidity Risk:** Securities in which the Sub-Fund invests may be sold below their intrinsic valuation due to insufficient liquidity in the market.

**Counterparty Risk:** A counterparty may fail in paying the proceeds of sale of assets to the Sub-Fund and/or may fail in delivering securities purchased by the Sub-Fund.

When categorizing the Sub-Fund it may happen that not all material risks were fully captured in the methodology. For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the Prospectus.

A **category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 fund is not twice as

risky as a category 1 fund.

The category is based upon the annual calculation of the Sub-Fund's risk calculation relevant to the nature of the types of instruments the Sub-Fund invests in. The risk category shown is not guaranteed and may change over time.
